

CHINTHA DEEPAK

Applied AI Engineer | Machine Learning · Computer Vision · Robotics

Bengaluru, Karnataka, India | +91 9032874706 | deepakchintha2305@gmail.com | LinkedIn: linkedin.com/in/chinthadeepak2305 | Portfolio: chintha-deepak-portfolio.vercel.app

CORE SKILLS

Programming

Python, C++

Machine Learning & AI

Deep Learning, NLP, Computer Vision, Neural Networks, Model Training & Evaluation

Frameworks & Libraries

TensorFlow, PyTorch, OpenCV, Pandas, NumPy, Matplotlib

Robotics & Automation

ROS2, CoppeliaSim, EPSON RC+, Vision Guide, SCARA & 6-axis Robots

IoT & Embedded

ESP32, Embedded Systems, API Integration, ThingSpeak

Web Development

React.js, Node.js, HTML/CSS,

Tools & Platforms

GitHub, Google Colab, MATLAB

CERTIFICATIONS

- Epson Robots Internship Program
- Artificial Intelligence — Teachnook
- AWS Cloud Practitioner Essentials
- AWS Technical Essentials
- RapidMiner Professional — Machine Learning & Applications/Use Cases

ACHIEVEMENTS

- NASA International Space Apps Challenge 2024 — “Galactic Problem Solver” award

EDUCATION

B.Tech, AI & Robotics

Dayananda Sagar University
2023 – 2027 (Expected)

Sri Chaitanya Junior College

Class XII · 2021 – 2023

Nagarjuna Model School

Class X · 2020 – 2021

LANGUAGES

English
Telugu
Hindi
Kannada

PROFILE

AI & Robotics engineering student with hands-on experience across machine learning, computer vision, and industrial automation. Recently completed a Robotics Engineering internship at Epson India, working directly with SCARA and 6-axis robot arms, EPSON RC+ programming, and vision/force sensor integration. Builds end-to-end intelligent systems spanning NLP, deep learning, and IoT, with a strong focus on translating research-grade models into deployable applications.

EXPERIENCE

Robotics Engineering Intern | Epson India Pvt Ltd, Bengaluru 6 Jul – 7 Aug 2026

- Worked hands-on with SCARA and 6-axis industrial robots, programming and testing pick-and-place and inspection routines using EPSON RC+.
- Integrated vision and force sensor systems using Epson Vision Guide and Force Guide toolchains for automated part detection and compliant assembly tasks.
- Diagnosed recurring vision/force sensor issues, documenting findings and corrective calibration steps in a technical report presented to the automation team.
- Gained exposure to real-world automation through industrial visits to Mekhos Technology Services and IBK Engineers.

AI & Machine Learning Intern | Teachnook, Bengaluru (Remote) Aug 2024 – Oct 2024

- Developed an NLP sentiment analysis pipeline processing 54,500+ tweets using Python and Scikit-learn, achieving 92% classification accuracy with Logistic Regression and Naive Bayes.
- Integrated Twitter APIs to automate real-time tweet collection and preprocessing.
- Built Power BI and Tableau dashboards to analyze sentiment trends across large-scale social media data.

PROJECTS

Autonomous Car System (Computer Vision) — Python, OpenCV, NumPy, ROS2

- Built an autonomous driving prototype in a ROS2 simulation environment with lane detection and object recognition using OpenCV pipelines.
- Designed real-time steering control logic and evaluated lane-tracking and obstacle-avoidance performance in simulation.

Twitter Sentiment Analysis Chatbot — Python, NLP, Scikit-learn, Tweepy, Streamlit

- Processed 82,000+ tweets using Logistic Regression, Naive Bayes, and Neural Networks, reaching 93% sentiment classification accuracy.
- Built a Streamlit dashboard for real-time sentiment visualization and deployed automated Twitter data collection.

IoT Real-Time Stock Portfolio Indicator — ESP32, DHAN API, JSON, OLED

- Built an ESP32 + OLED based stock monitoring system integrating DHAN trading APIs for live portfolio data every 30 seconds.
- Implemented HTTPS/JSON communication and LED-based profit/loss indicators with 15–30s system latency.

AI-Based Cataract Detection — Python, TensorFlow, CNN, Transfer Learning

- Trained a ResNet50 model via transfer learning on the Kaggle ODIR dataset (5,000 patients), achieving 98.6% classification accuracy (F1 ≈ 0.99).
- Evaluated performance using confusion matrix, precision, recall, and F1-score metrics.
